

### **ADMINISTRATION OF ALTERNATIVE MEDICATIONS**

All medications will be administered under the direction of the school nurse. Only FDA approved pharmaceuticals manufactured in the United States will be administered.

Alternative medications, such as remedies, enzymes, herbs, vitamins, dietary supplements, homeopathic medicines and preparations, or medications from other countries will not be administered to school children by school staff.

The school district will accommodate families by allowing a parent or guardian to personally administer alternative medications or preparations during the regular school day. Administration by the parent/guardian should coincide with minimal disruption of academic activity for the student involved.
