Code No. 505.5R

Policy Title: GRADUATION REQUIREMENTS

Beginning with the summer of 2000, Northeast will not be computing the Driver's Education grade into the cumulative point average. The course will be given credit toward graduation.

The rationale includes the fact that Northeast teachers are not teaching the course and the administration, teaching and awarding of grades has been delegated to an outside agency.

All grades given for work study, service learning education and the IJAG program will not be computed into the cumulative grade point average of Northeast students. These courses will be given credit toward graduation.

The rationale includes the fact that we have a variety of ways that we give credit. Some of these experiences require that we ask persons outside of Northeast School to make judgments about student achievement. We do not believe these judgments should be included in the cumulative grade point average.
